# **Pipes & Pipe Fitting:**

## **Piping Material**

ATGC deals with manufacturing & supply pipes and pipe fittings to suit the operating conditions of the piping system.

Guidance of selecting the correct material can be obtained from standard piping codes.

The objective being to ensure that the material supplied is entirely safe under the operating conditions of pressure, temperature, corrosion, and erosion expected.

## **Pipe Fittings**

All fitting is used in pipe systems to connect straight pipe sections, adapt to different sizes or shapes and for other purposes, such as regulating (or measuring) fluid flow. Pipe Fittings (especially uncommon types) require money, time, materials and tools

# **Firefighting Vehicles Trucks & Ambulance:**

ATGC promotes fire safety Vehicles by providing security and innovative life solutions all under one roof, company offers a wide range of world- class fire fighting vehicles such as trucks & Ambulances.

## **Power plants:**

ATGC has involved in high-tech enterprise engaged in manufacturing, project construction of Solar Thermal Power Generation. It also provides integrated-green-energy services, including: development, investment, construction and operation of solar thermal, photovoltaic, wind power generation, clean energy heating, energy storage, micro-grid and integrated energy management, demand power management and trading, integrated urban smart energy solutions. Our Company has mastered the key technologies of solar thermal power generation and heating, and has obtained complete independent intellectual property rights of the solar thermal industry chain, the company provides smart green electric and thermal energy to group customers. The application scenarios include urban heating, hotel energy management, automobile, metallurgy, water treatment, oil exploration and other industries with high energy demand and strict environmental protection requirements. With solar thermal, distributed photovoltaic, decentralized wind, biomass heating and building energy management, Company provides integrated services for energy production and optimized operation.

## **Water treatment Plant:**

Our core mission is to provide high-quality, cost-effective water treatment solutions that improves the quality of water to make it more acceptable for a specific end-use. The end use may be drinking, industrial water supply, irrigation, river flow maintenance, water recreation or many other uses, including being safely returned to the environment. Continual product development is our mandate; we are constantly striving to improve our products to suit our customers' individual needs while ensuring improvement to the environments and ecosystems in which they are applied. Since our inception, we have completed many water and wastewater projects for customers worldwide, which stand as a testament to our ongoing commitment to provide the highest quality service, products, and after-sales support in the industry.

## **Waste Management:**

Our Mission is to work towards building and implementing integrated waste management and pest control systems according to the highest standards adopted globally, through optimal investment of assets, specialized human resources and world class technological solutions, to convert all waste into valuable economic resources for the emirate of Abu Dhabi and thereby nature a responsible sustainable society and to be recognized as a world leader in building a sustainable integrated waste management and pest control system by 2030.

## **Supply of trailers & tankers:**

We are largest tank trailer manufacturing, parts, and service organization. Working with commercial and private fleets of all sizes, we design, build, and support the best trailers for hauling dry and liquid bulk freight.

The company produces custom-built aluminum, stainless steel, and carbon steel tank trailers. With three manufacturing facilities and the industry's most experienced sales and engineering teams, we produce a full line of liquid and pneumatic tanks for crude oil, hot oil, refined fuels, propane, chemicals, corrosives, food products, and other bulk commodities.

# Production of cement:

The Production of a cement in the Emirate of Ras Al Khaimah, the annual production volume of which is 2 Million/year and shall be upgraded to 4 Million tons after short time, is a vivid example of the effective diversification of the national economy. This project was designed to meet the UAE domestic demand for raw and building materials. It should be noted that the major costs of the development of the building materials production are covered by the state.

Transport plays a vital role in the UAE's plan for the rapid progress and development. Transportation is crucial to the construction industry particularly in the development of roads, bridges, and power generation stations, new cities, seaports, airports, petroleum and industrial plants.

Starting with a small fleet of trucks providing transport for the Abu Dhabi Municipality, the company has grown and diversified into area leveling and sand-filling projects for new housing and urban development projects in Abu Dhabi.

Our fleet includes large trucks, graders, wheel loaders, earth moving equipment, batching plants, dozers, asphalt pavers and related equipment manned and operated by skilled personnel. ATGC recognizing the need for proper maintenance and upkeep of its vehicles and equipment, established its own workshop with state-of-the-art facilities to ensure that all equipment is at optimum production capability, thus ensuring maximum output and timely execution of contracts.

## Transport Division

## WE BELIEVE IN CUSTOMER SATISFACTION

Customer satisfaction has always been our establishment's major permanent objective and all our business decisions, short and long term, have been built around this objective.

With our team you can be sure of the best possible support and services - not just in the short term, but the long term services which are so important to this environment

The United Arab Emirates has become an international example form the tremendous strides it has taken in its ongoing development, the growth witnessed is unprecedented in this region, and perhaps all over the world. Needless it mention here that, the positive thinking and pst achievements including our invaluable experience in various fields of construction has helped us to forge ahead.

Our goal is to excel at every endeavor that we choose to take up while making qualitative contribution to enhance our company's name throughout the Middle East.
